Computer Science graduate from Institut Teknologi Bandung with a strong focus on Software Engineering and AI/ML. Experienced in building production-level web and mobile applications using Go, Vue, Laravel, and Flutter. Beyond full-stack development, I specialize in designing AI models and automated pipelines for recommendation systems. With experience in AI/ML education and research, I build scalable software, lead backend development, and integrate intelligent, data-driven features into real-world products.

EDUCATION

Institut Teknologi Bandung – Bandung, ID Aug 2022 – Jul 2026
Bachelor of Engineering, Computer Science

- **Thesis:** Development of Process-Supervised Multi-Agent Retrieval-Augmented Generation for Constraint Satisfaction in Tourism Itinerary Recommendation Systems: A Case Study in the Bandung Region.
- GPA: 3.39 of 4.00.

PROFESSIONAL EXPERIENCE

Institut Teknologi Bandung (WRAM) – Bandung, ID Oct 2026 – Present
System Engineer

- Analyze requirements, develop, test, and maintain systems supporting the WRAM environment under the assigned technical direction.
- Prepare technical and user documentation to support system delivery, operation, and maintenance.
- Coordinate with related teams and units, and communicate implementation progress and delivery status regularly.
- Apply information-security, data-confidentiality, and IT-governance requirements throughout system development and maintenance.

Ulinify – Bandung, ID Aug 2026 – Present
Chief Technology Officer

- Set technical direction and own end-to-end delivery for Ulinify, a sustainability platform that turns user activity into personalized challenges and rewards.
- Architect and operate the production platform across an Express/Bun API, PostgreSQL, containerized web/backend/database services, and a Caddy TLS reverse-proxy layer.
- Drive secure, AI-enabled product delivery through authenticated APIs, validation and rate limiting, image-upload workflows, Firebase notifications, and OpenAI-powered photo verification.
- Accelerate engineering delivery with agentic coding workflows using Claude Code, Codex, and Hermes Agent, alongside n8n automations for repeatable product and operational workflows.

SpedGrow Pte Ltd – Singapore, SG Jun 2025 – Present
Software Engineer

- Develop and ship BuddINg Life, a financial-literacy platform, across Flutter mobile, Angular admin, React/Vite web, and Strapi 5 backend surfaces.
- Delivered production account and commerce workflows spanning authentication, password recovery, subscriptions, contact flows, and user-scoped shopping carts.
- Built AI-assisted challenge creation and strengthened the student/educator experience through permission-aware dashboards, insights, and reliable notification flows.
- Raised delivery quality by migrating services and web tooling to Bun and Vite, adding automated test coverage, and implementing CI/CD validation and staged deployment workflows.

PT. Oviatech Prima Integra – Bandung, ID Jun 2025 – Oct 2025
Data Engineer

- Designed and developed Python-based ETL pipelines to process data from Apache Hive datamarts using SQLAlchemy for data manipulation.
- Delivered standardized datasets through internal APIs built with FastAPI, ensuring efficient data accessibility for downstream systems.
- Registered pipelines in the data catalog to maintain data consistency, traceability, and governance across projects.

Magna Partners – Jakarta, ID Nov 2024 – Aug 2025
Software Engineer

- Developed REST APIs using Go (Gin) and migrated the architecture to microservices (Go + PostgreSQL).
- Built key frontend components in React.

Delegasi.co – Bandung, ID Feb 2025 – May 2025
Software Engineer

- Developed backend APIs using Express.js and Baserow for a web-based HR management system.
- Implemented key features such as leave management and reimbursement, with role-based access for employees and HR.
- Contributed to frontend and system integration to ensure seamless functionality across modules.

PROJECTS & ORGANIZATIONAL EXPERIENCE

Artificial Intelligence Laboratory ITB – Bandung, ID Jul 2024 – Jun 2026
Laboratory Assistant

- Assisted in three core courses: Artificial Intelligence, Machine Learning, and Computational Logic.
- Designed project specifications, created datasets, and organized practical sessions via Kaggle-style competitions.
- Conducted research and provided technical support in AI-related projects and course materials.

Kabinet KM ITB – Bandung, ID Jul 2025 – Apr 2026

Deputy Minister of Information and Technology

- Co-led the ministry with the Minister, managing three directorates: Frontend, Backend, and UI/UX.
- Directly led backend and database development efforts across KM ITB platforms.
- Oversaw improvement of the KM ITB Website and Data Center, and initiated development of Wiki KM ITB, a new platform containing curated campus-related knowledge.

Google Developer on Campus ITB – Bandung, ID Sep 2024 – Nov 2025

AI Curriculum Coordinator

- Designed AI learning pathways centered on Google Gemini.
- Created task specifications and evaluated projects.
- Facilitated workshops and technical mentoring.

Himpunan Mahasiswa Informatika (HMIF) ITB – Bandung, ID Jul 2024 – May 2025

Software Engineer

- Built and maintained backend services using Hono, Drizzle ORM, and PostgreSQL.
- Developed frontend features using React and managed data-fetching/state via TanStack Query.

Arkavidia 9.0 – Bandung, ID Nov 2024 – May 2025

Deputy Head of Datavidia

- Led 12 staff in organizing a national-scale data science competition.
- Coordinated technical and logistical requirements, from problem design to judging.
- Attracted ~500 participants (~300 teams) and partnered with academics and sponsors.

Robotics Unit (KRSRI) ITB – Bandung, ID Jan 2024 – Mar 2025

Head of Robotic Software Engineer

- Led implementation of ROS2, algorithms, and computer vision in autonomous robots.
- Translated research into working robotic systems for national competition.

ACHIEVEMENTS

Anugerah Citra Ganesha Awardee – Bandung, ID Nov 2025

Awarded the Ganesha Award, the highest institutional honor at ITB, in recognition of outstanding achievements, leadership, and contributions in academic excellence, technology development, and student organizations.

1st Place – FindIT! Data Analyst Competition 2025 – Yogyakarta, ID May 2025

Achieved 1st place among 227 competing teams nationwide, utilizing a weighted average ensemble for prediction and in-depth analysis of COPPA violation data. Held by DTETI Universitas Gadjah Mada.

Finalist of National Data Mining Competition GEMASTIK XVII 2024 – Semarang, ID Sep 2024

Ranked in the top 20 of a prestigious national inter-university data mining competition.

Finalist of National Data Mining Competition GEMASTIK XVI 2023 – Malang, ID Sep 2023

Ranked in the top 20 of a prestigious national inter-university data mining competition.

CERTIFICATIONS

TOEFL Academic Jan 2022

Scored 612.

LANGUAGES AND SKILLS

- **Languages:** Bahasa Indonesia (Native), English (Professional Working Proficiency).
- **Programming Languages:** Python, C, C++, Java, TypeScript, Go, PHP, Kotlin, Flutter (Dart).
- **Web Development:** Next JS, React JS, Express JS, Hono, Gin, Drizzle ORM, Django, Laravel.
- **Agentic Engineering & Automation:** Claude Code, Codex, Hermes Agent, n8n, Antigravity, Testsprite, OpenClaw, Hugging Face.
- **AI/ML and Data Engineering:** Pandas, NumPy, TensorFlow, PyTorch, PostgreSQL, Spark, Kafka, Apache Airflow, Hadoop (Hive).
- **Technical Expertise:** Data Analysis, Software Engineering, AI/ML Engineering.
- **Passionate in:** Artificial Intelligence, Agentic AI, Data Science, Software Engineering, Business, and Finance.
