Computer Science graduate from Institut Teknologi Bandung with a strong focus on Software Engineering and AI/ML. Experienced in building production-level web and mobile applications using Go, Vue, Laravel, and Flutter. Beyond full-stack development, I specialize in designing AI models and automated pipelines for recommendation systems. With experience in AI/ML education and research, I build scalable software, lead backend development, and integrate intelligent, data-driven features into real-world products. Also experienced in building internal institutional systems that integrate with legacy databases, including an admissions platform at ITB.

EDUCATION

Institut Teknologi Bandung – Bandung, ID Aug 2022 – Jul 2026
Bachelor of Engineering, Computer Science
- **Thesis:** Development of Process-Supervised Multi-Agent Retrieval-Augmented Generation for Constraint Satisfaction in Tourism Itinerary Recommendation Systems: A Case Study in the Bandung Region.
- GPA: 3.39 of 4.00.

PROFESSIONAL EXPERIENCE

Institut Teknologi Bandung (WRAM) – Bandung, ID Oct 2026 – Present
System Engineer
- Built the Admission module of Seven, ITB's integrated platform replacing legacy systems (Go, Vue 3/TypeScript, PostgreSQL, OpenAPI).
- Designed a stage-driven workflow (bulk Excel nomination, check-in, NIM, visa/EPO, check-out) with stages derived in SQL from the legacy database.
- Implemented per-section optimistic concurrency (409 on stale edits) and a Seven-side audit trail for a shared legacy database.
- Authored ADRs and forward-only migrations; shipped 200+ frontend tests and DB-backed Go integration tests.
- Refactored section handlers into a shared framework, cutting the HTTP handler layer from 330 to 130 lines.

Ulinify – Bandung, ID Aug 2026 – Present
Chief Technology Officer
- Set technical direction and owned end-to-end delivery of Ulinify, a sustainability platform with personalized challenges and rewards.
- Operate the production stack: Express/Bun API, PostgreSQL, containerized services, and a Caddy TLS reverse proxy.
- Built secure, AI-enabled features: authenticated APIs, rate limiting, image uploads, Firebase notifications, and OpenAI photo verification.
- Accelerated delivery with agentic workflows (Claude Code, Codex, Hermes Agent) and n8n automations.

SpedGrow Pte Ltd – Singapore, SG Jun 2025 – Present
Software Engineer
- Built and shipped BuddINg Life, a financial-literacy platform across Flutter, Angular, React/Vite, and Strapi 5.
- Delivered auth, password recovery, subscriptions, contact flows, and user-scoped carts.
- Built AI-assisted challenge creation and permission-aware dashboards and notifications.
- Migrated tooling to Bun and Vite, added test coverage, and set up CI/CD with staged deployments.

PT. Oviatech Prima Integra – Bandung, ID Jun 2025 – Oct 2025
Data Engineer
- Built Python ETL pipelines over Apache Hive datamarts using SQLAlchemy.
- Delivered standardized datasets through FastAPI internal APIs.
- Registered pipelines in the data catalog for consistency, traceability, and governance.

Magna Partners – Jakarta, ID Nov 2024 – Aug 2025
Software Engineer
- Developed REST APIs in Go (Gin) and migrated the architecture to microservices on Go + PostgreSQL.
- Built key React frontend components.

Delegasi.co – Bandung, ID Feb 2025 – May 2025
Software Engineer
- Built backend APIs with Express.js and Baserow for an HR management system, including leave and reimbursement with role-based access.
- Contributed to frontend work and module integration.

PROJECTS & ORGANIZATIONAL EXPERIENCE

Artificial Intelligence Laboratory ITB – Bandung, ID Jul 2024 – Jun 2026
Laboratory Assistant

- Assisted in three core courses: Artificial Intelligence, Machine Learning, and Computational Logic.
- Designed project specifications, created datasets, and organized practical sessions via Kaggle-style competitions.
- Conducted research and provided technical support in AI-related projects and course materials.

Kabinet KM ITB – Bandung, ID Jul 2025 – Apr 2026

Deputy Minister of Information and Technology

- Co-led the ministry with the Minister, managing three directorates: Frontend, Backend, and UI/UX.
- Directly led backend and database development efforts across KM ITB platforms.
- Oversaw improvement of the KM ITB Website and Data Center, and initiated development of Wiki KM ITB, a new platform containing curated campus-related knowledge.

Google Developer on Campus ITB – Bandung, ID Sep 2024 – Nov 2025

AI Curriculum Coordinator

- Designed AI learning pathways centered on Google Gemini.
- Created task specifications and evaluated projects.
- Facilitated workshops and technical mentoring.

Himpunan Mahasiswa Informatika (HMIF) ITB – Bandung, ID Jul 2024 – May 2025

Software Engineer

- Built and maintained backend services using Hono, Drizzle ORM, and PostgreSQL.
- Developed frontend features using React and managed data-fetching/state via TanStack Query.

Arkavidia 9.0 – Bandung, ID Nov 2024 – May 2025

Deputy Head of Datavidia

- Led 12 staff in organizing a national-scale data science competition.
- Coordinated technical and logistical requirements, from problem design to judging.
- Attracted ~500 participants (~300 teams) and partnered with academics and sponsors.

Robotics Unit (KRSRI) ITB – Bandung, ID Jan 2024 – Mar 2025

Head of Robotic Software Engineer

- Led implementation of ROS2, algorithms, and computer vision in autonomous robots.
- Translated research into working robotic systems for national competition.

ACHIEVEMENTS

Anugerah Citra Ganesha Awardee – Bandung, ID Nov 2025

Awarded the Ganesha Award, the highest institutional honor at ITB, in recognition of outstanding achievements, leadership, and contributions in academic excellence, technology development, and student organizations.

1st Place – FindIT! Data Analyst Competition 2025 – Yogyakarta, ID May 2025

Achieved 1st place among 227 competing teams nationwide, utilizing a weighted average ensemble for prediction and in-depth analysis of COPPA violation data. Held by DTETI Universitas Gadjah Mada.

Finalist of National Data Mining Competition GEMASTIK XVII 2024 – Semarang, ID Sep 2024

Ranked in the top 20 of a prestigious national inter-university data mining competition.

Finalist of National Data Mining Competition GEMASTIK XVI 2023 – Malang, ID Sep 2023

Ranked in the top 20 of a prestigious national inter-university data mining competition.

CERTIFICATIONS

TOEFL Academic Jan 2022

Scored 612.

LANGUAGES AND SKILLS

- **Languages:** Bahasa Indonesia (Native), English (Professional Working Proficiency).
- **Programming Languages:** Python, C, C++, Java, TypeScript, Go, PHP, Kotlin, Flutter (Dart).
- **Web Development:** Vue 3, Vite, TanStack Query, Vitest, Next JS, React JS, Express JS, Hono, Gin, Drizzle ORM, Django, Laravel.
- **Backend and Infrastructure:** Go (GORM, sqlc), PostgreSQL, Redis, OpenAPI, OIDC (Azure Entra SSO), Docker Compose, GitLab CI.
- **Agentic Engineering & Automation:** Claude Code, Codex, Hermes Agent, n8n, Antigravity, Testsprite, OpenClaw, Hugging Face.
- **AI/ML and Data Engineering:** Pandas, NumPy, TensorFlow, PyTorch, PostgreSQL, Spark, Kafka, Apache Airflow, Hadoop (Hive).
- **Technical Expertise:** Data Analysis, Software Engineering, AI/ML Engineering.
- **Passionate in:** Artificial Intelligence, Agentic AI, Data Science, Software Engineering, Business, and Finance.
