Data Engineer and Computer Science graduate from Institut Teknologi Bandung, focused on building reliable data pipelines and the systems that consume them. Designs Python ETL over Apache Hive datamarts with SQLAlchemy, exposes standardized datasets through FastAPI, and maintains catalog-level consistency, traceability, and governance. Backs this with production software engineering in Go and PostgreSQL and hands-on modelling experience — 1st place among 227 teams at the FindIT! Data Analyst Competition 2025 and twice a national GEMASTIK data mining finalist.

PROFESSIONAL EXPERIENCE

PT. Oviatech Prima Integra – Bandung, ID Jun 2025 – Oct 2025
Data Engineer
- Built Python ETL pipelines over Apache Hive datamarts using SQLAlchemy.
